

WINTER SERVICE PROGRAM

Storr Tractor Company

\$110.00 per machine.
\$220 for Toro 580D/5900D
Cost will be applied to any repair.

Now is the time to take a breath and relax knowing you completed another year with success. The success that you had did not just happen. This was all part of careful planning and the equipment that helped you perform your work. To help you keep performing at your peak, you need to keep your equipment in top condition. You may have made a repair or two to get you by but now is the time to let the factory trained professionals go through your equipment. Much of today's equipment requires ANNUAL SERVICE to keep it operating at the standards you have come to expect.

In order to help you keep these critical pieces of equipment operating throughout the growing season, Storr Tractor Company is again offering our WINTER SERVICE PROGRAM. This program is offered to help reduce down time and increase productivity. We can custom tailor a repair to your budget.
